REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: In consideration of the Remarks (12/29/2003) and, in reconsideration of the prior Office Actions and the responses thereto, the claimed invention is neither expressly disclosed nor fairly suggested by the prior art. The prior art does not disclose or make obvious a method of supplementing the diet of an athlete with arginine, protein, carbohydrate and one or more of glycosidal saponins, ginseng, N-acetyl cystein, glucomannan and folic acid, where the weight ratio of protein to carbohydrate is about 7 to 1.

Examiner notes that only the abstract of the reference JP 63109736 accompanied the IDS (12/29/2003). Examiner has obtained a full copy of the Japanese language reference for the record. Except for Diaz et al. (US Pat. 5,891,441), the other US Patent Documents were previously cited in PTO-892s, as such, the same have been crossed-out on the PTO -1449. Further, Applicant has provided full copies of the references related to the STN/CAS abstracts. Since the STN/CAS abstracts were cited in previous PTO-892s, Examiner has crossed-out portions of the IDS citing to the STN/CAS abstract, thus, leaving the cites to the said references.

This application presents a claim for subject matter not originally claimed or embraced in the statement of the invention as indicated above. A supplemental oath or declaration is required under 37 CFR 1.67. The new oath or declaration must properly identify the application of which it is to form a part, preferably by application number and filing date in the body of the oath or declaration. See MPEP §§ 602.01 and 602.02.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
